

# Multispectral Thermal Imager Proposal Agreement

## Agreement

In return for receiving MTI data, the Principal Investigator agrees to:

- (a) Safeguard unpublished MTI mission data and other project information obtained during the course of this experiment, whether obtained from DOE, its contractors, other collaborating organizations or their contractors, and not distribute it to any individual not named on the proposal without written approval from the MTI Project Manager or Deputy. (Brian C. Brock, Sandia National Laboratories (SNL), 505-845-9822, [bcbrock@sandia.gov](mailto:bcbrock@sandia.gov) or Steven C. Bender, Los Alamos National Laboratory (LANL), 505-667-4944, [sbender@lanl.gov](mailto:sbender@lanl.gov))
- (b) If using the Data Processing and Analysis Center (DPAC) web page to select and order imagery, comply with all computer security requirements imposed at LANL, where the MTI DPAC is located. Many of these requirements may be found at: <http://int.lanl.gov/orgs/s/> or <http://www.lanl.gov/worldview/organization/s/>.
- (c) Ensure that only U.S. citizens have access to unpublished MTI data.
- (d) Provide image data products, ground truth, and other data collected during this experiment along with experimental results to the DOE and its laboratories, unless otherwise noted and explained in this proposal. Collaborate with one or more of the Laboratories, if feasible.
- (e) Comply with required Laboratory review of resulting publications for technical content and national security issues, prior to submission. Publications include reports, manuscripts, submissions to conferences, and WWW pages intended to be accessible to individuals outside the proposer's team. This process typically takes about a week. Publications produced with SNL collaborators must be cleared through SNL, publications produced with LANL collaborators must be cleared through LANL, and publications not involving either SNL or LANL must be cleared through at least one of the Laboratories.
- (f) Acknowledge the United States Department of Energy – Office of Nonproliferation and National Security as the MTI sponsor in all publications utilizing MTI data. (Principal DOE laboratories are Sandia National Laboratories, Los Alamos National Laboratory, and Savannah River Technology Center).
